

# Vinayak Arya

Aligarh, UP, India | aryavinayak275@gmail.com | +91-8439212915 | LinkedIn | Github

## Education

**Indian Institute Of Information Technology, Nagpur (IIITN)** Sept 2022 – May 2026

*BTech. in Computer Science with specialization in Artificial intelligence and Machine Learning*

**Relevant Coursework:** Probability and Statistics, Data Structures, Introduction to Linear Algebra, Machine Learning, Artificial Intelligence, Software Engineering, Design and Analysis of Algorithms, Database Management Systems, Operating Systems, Robotics, Generative AI.

## Technical Skills

- **Languages:** C, C++, SQL, Python, HTML, PHP
- **Technologies:** TensorFlow, Keras, Scikit-learn, PyTorch, Power BI, NumPy, Pandas, Matplotlib
- **Frontend:** React.js, TypeScript, Next.js, Tailwind CSS
- **Backend:** Express.js, Node.js
- **Soft Skills:** Time management, Problem solving, analytical thinking, communication, Leadership, Curiosity.

## Experience

**Student Placement Cell** Jan 2023 – Feb 2026

- **Company Outreach:** Led the Outreach Team in establishing connections with 20+ companies, successfully persuading them to participate in campus recruitment drives.
- **Industry Engagement:** Directly engaged with company representatives, securing commitments for recruitment events, and enhancing the college's placement opportunities.

## Projects

**Epileptic Seizure Detection Using Machine Learning** | Python, Scikit-learn, TensorFlow, Keras, NumPy, Pandas, Matplotlib Jan 2024

- Achieved 97.95% accuracy in predicting seizures from EEG data using an MLP classifier.
- Applied data preprocessing, feature scaling, and hyperparameter tuning to optimize model performance.
- Built visualizations to interpret model predictions and support medical insights.

**Conversational AI Agent** | Python, FastAPI, Google Gemini AI, WebSocket, Speech Recognition, JavaScript June 2024

- Built a conversational AI agent with Hindi/English voice recognition, text-to-speech, and automatic language detection.
- Developed a ChatGPT-like web app with a Python FastAPI backend, REST API, WebSocket support, and a responsive frontend with real-time chat.
- Implemented a learning agent that stores user preferences and patterns in JSON to personalize responses.

**Taxi Booking Application** | Next.js, React.js, TypeScript, Tailwind CSS, MapBox Nov 2024

- Built a Taxi & Bike booking app using Next.js, React, and TypeScript with real-time maps, payments, and authentication.
- Integrated MapBox for route mapping and Stripe for secure payments with user authentication via Clerk.
- Designed a scalable, responsive UI using Tailwind CSS and deployed with Vercel.

## Achievements

Ranked in the top 10% globally in a LeetCode contest.

Solved more than 500 problems on various coding platforms.
