Education

Indian Institute of Information Technology, Nagpur

2022 – 2026

Bachelor of Technology in Computer Science Engineering (AI & ML)

Relevant Coursework: Data Structures & Algorithms, OOPs, DBMS, Operating Systems, Computer Networks, Machine Learning, Software Engineering

Technical Skills

- **Languages:** Python, C++, JavaScript, TypeScript, SQL
- **Frontend:** React.js, HTML5, CSS3, Tailwind CSS
- **Backend:** Node.js, Express.js, FastAPI, REST APIs, WebSockets
- **AI & Product Systems:** Generative AI, LangChain, RAG Pipelines, Prompt Engineering, OpenAI APIs
- **Cloud & DevOps:** AWS, Docker, Git, GitHub, CI/CD
- **Databases & Tools:** MongoDB, MySQL, Redis, Postman

Experience

SIDA Technologies (*Software Engineering Intern*)

June 2025 – Dec 2025

- Developed backend APIs and scalable web modules using Node.js, React.js, and MongoDB for client-facing applications.
- Worked on authentication systems, API integrations, and database optimization to improve application performance and reliability.

Sunstone School of Technology (*Software Engineering Intern*)

Jan 2026 – Present

- Built full-stack dashboards and workflow management systems using React.js, Node.js, and SQL for internal operational platforms.
- Developed automation workflows and optimized backend services to improve scalability and application efficiency.

Projects

AI-Powered Distributed Knowledge Engine

2025

- Developed an enterprise-scale AI knowledge engine using React, FastAPI, LangChain, and vector databases for contextual multi-document retrieval and intelligent query resolution.
- Designed Retrieval-Augmented Generation workflows with semantic indexing, distributed processing pipelines, and scalable backend APIs supporting large concurrent workloads.

Event-Driven Commerce Infrastructure Platform

2025

- Built a cloud-native commerce platform using React, Node.js, MongoDB, Redis, and event-driven microservices architecture for scalable transaction processing.
- Implemented real-time inventory synchronization, payment orchestration workflows, and distributed backend services optimized for high concurrency and low-latency operations.

Achievements

- Achieved a LeetCode rating of 1700+ and solved 500+ DSA problems across coding platforms
- Qualified for the Amazon ML Challenge
- Ranked among top 10% participants in leetcode coding contest.
